

Roxtec ComPlus™

– CABLE ENTRY SEAL READY FOR FUTURE NEEDS

The Roxtec ComPlus™ is a flexible cable sealing solution developed for communication shelters and other constructions demanding low weight. The composite frame consists of sections put together as one single frame or multiple openings in width allowing tailor-made combinations.

Unique design

Installation is easy, and no special tools or extra parts are required. The integrated knock-out cover protects the integrity of the structure in stock, during transport and until cable

installation. To route and seal cables, just knock it out and fill the opening with Roxtec sealing modules.

Built-in spare capacity

Roxtec modules are adaptable to cables of different sizes which simplifies design, installation and logistics. The knock-out cover can be kept to provide spare capacity for future expansion. You can do retrofit work with no downtime, without knowing the cable sizes in advance. Roxtec ComPlus™ is ideal throughout the lifecycle of your network.

BENEFITS

- Light-weight
- Quick and easy to install
- Attachment by bolting or riveting
- Approved for IP 54
- Multidiameter™ by Roxtec – adapts through modules with removable layers

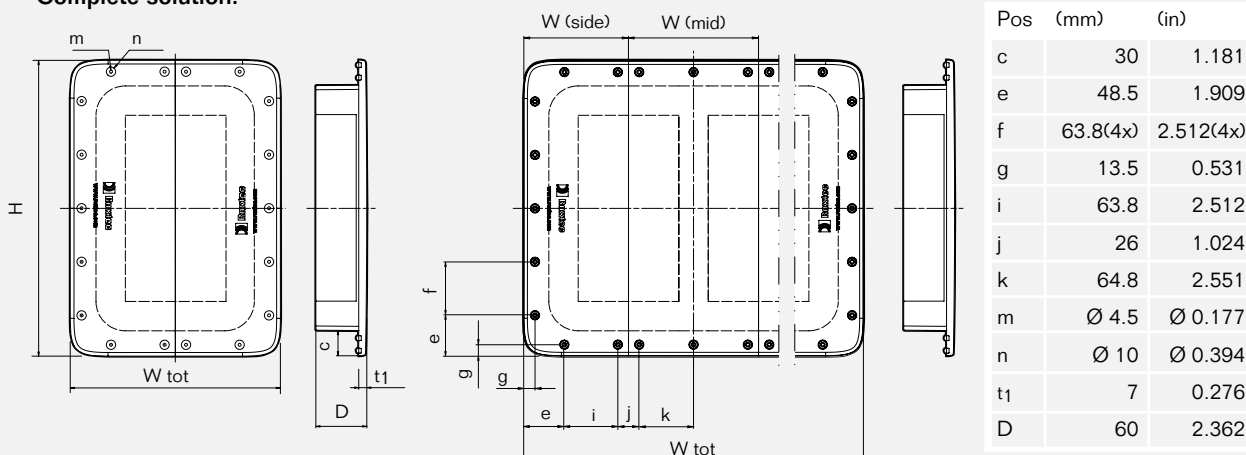

ComPlus frame side section

ComPlus frame mid section

RATINGS		IP: 54				
---------	--	--------	--	--	--	--

Frame	Parts	External dimensions (D 60 mm)		Weight		Art. no.
		HxW (mm)	HxW (in)	(kg)	(lb)	
ComPlus frame side section	1	352 x 125	13.858 x 4.921	1.0	2.094	CPFS006006010
ComPlus frame mid section	1	352 x 156	13.858 x 6.142	1.2	2.756	CPMS006006011

Complete solution:

$W_{tot} = 250 \text{ mm} + (\text{No of mid sections} \times 156 \text{ mm})$

$W_{tot} = 9.843" + (\text{No of mid sections} \times 6.142")$

For a complete frame, you need:

Frame	size	side section	mid section	packing space
ComPlus	6x1	2	0	180x120
ComPlus	6x2	2	1	180x120x2
ComPlus	6x3	2	2	180x120x3

Note: All dimensions are nominal values
