Utility Protection Systems

- Highly visible
- Impact resistant
- Durable
- Lightweight
- Easy to install
- Custom manufactured
- Cost effective
- Fully approved

Protection for underground cables and pipes
Stokbord® cable protection covers provide heavy-duty protection for underground cables and pipes. Manufactured from high impact recycled polyethylene, the covers have been specially developed to withstand damage from plant and tools. They provide highly visible and durable warnings against possible accidental damage.

Their high visibility, ease of installation and ability to resist both hand tools and mechanical plant, make them the product of choice for utility protection, particularly for high voltage cables.

While offering a high level of durability and impact resistance, the cable covers are light in weight and are exceptionally easy to handle and install. They are fully jointed, laid overlapped and held firm with plastic pegs to ensure continuous protection.

Advantages

- Impact resistant – doesn’t shatter on impact
- Provides clear visual warning when uncovered
- Lightweight – easy to transport, carry and install
- Fully jointed to provide unbroken protection
- Approved and specified by utilities throughout the world

Typical applications/colours

- High voltage electric cables
- Water pipes
- Gas pipes
- Telecoms

Covers can be supplied to order in different colours. Utility company names/logos can also be printed on covers for identification purposes. Message can be in English or any language specified.

Standards and approvals

- Impact protection to BS2484, 1985, Part 4 Appendix A
- ENA-TS 12-23, Issue 3 2013
- National Grid TS 3.05.07 Issue 6 2011 Appendix A
- Approved by utility companies worldwide

Subject to minimum order quantities, Stokbord cable protection covers can be custom-made in a range of different colours and sizes. Contact Centriforce for further information.
Tapetile cable protection tape is a flexible product supplied in roll format. Tapetile cable protection tape is manufactured from heavy duty, recycled polyethylene and, while flexible enough to be delivered in a roll, it provides a high level of durability. Extremely cost-effective in use, the tape is designed to provide a clear visual warning when uncovered.

Installation is a simple matter of unrolling the tape in the trench, where it provides highly efficient and very cost-effective protection to underground cables.

Tapetile cable protection tape is normally used for lower voltage electric cables, street lighting cables, fibre optic and other communication cables as well as for gas and water pipelines.

Advantages
- Clear visual warnings when uncovered
- Flexible and lightweight
- Fast and easy installation
- Extremely cost-effective in use
- Approved and used by utility companies throughout the world

Typical applications/colours

- Low voltage electric cables
- Water pipes
- Gas pipes
- Telecoms

Centriforce Products Ltd

Centriforce has been at the forefront of plastics recycling in the UK for over 30 years and is now one of the largest independent recyclers of plastic waste into end-use products. Our core business is the manufacture of high performance products from plastic waste such as plastic bottles, carrier bags and packaging film, much of which would otherwise be sent to landfill.

Our primary brand is Stokbord®, the most popular plastic board available in the UK and widely used in numerous applications, including utility protection.

Centriforce high performance products, manufactured exclusively from recycled plastics, are now used in a wide range of commercial sectors including construction, agriculture, transport and materials handling.

The company operates from a large site in Liverpool equipped with the manufacturing facilities, technical expertise and manpower to process over 20,000 tonnes of plastic per year. Its innovative approach to product development enables the company to work with clients to develop new product applications that meet their requirements and reduce reliance on non-renewable raw materials. All products can be recycled at the end of their working lives.

Centriforce ‘closed loop recycling solutions’ are already being utilised by many household names, such as Waitrose, TNT and Government Agencies, to manage their waste more effectively and help meet their corporate social responsibility objectives.

Centriforce is fully accredited to ISO9001 and OHSAS18001.
