

Specific tape or plate dedicated to fire protection of joints and cables (from LV to HV)

Description

Nexans Fire Protection Tape is designed to be used onto standard LV / MV / HV joints in applications where low smoke emission and fire non propagation are needed.

It is made of a specific compound created by Nexans Research Center complying with:

- IEC/EN 60332-1-2 / NFC 32070 cat C2
- EN 50399 (CPR) (Euroclass B2ca, s1a, a1, d0)
- NF C 32070 cat C1 (propagation requirement lower than 30 cm)
- FT4/IEEE1202
- IEC/EN 60754-2 (Halogen Free)
- IEC/EN 61034-2 (Low Smoke)
