

SMALL BORE PE COILED DUCT POWER

EF450-030 (Rev3)

General

Emtelle Small Bore PE (Polyethylene) Coiled Duct is a solid wall duct and is designed, manufactured and supplied within an Integrated Management System, incorporating internationally recognised Standards including ISO 9001:2008, ISO 14001:2004 and ISO 18001:2007.

Small bore coiled duct is primarily used for electricity service cable and is manufactured to comply with ENATS 12-24 industry standard.

The duct is printed with standard markings, plus any additional information required by the customer, to give durability and traceability after installation.

All duct sizes are supplied in individual coiled lengths; these coils are then packed together in groups of 4 coils. Packaging must be recycled locally.

Colour fastness and UV stability is for UK and Ireland only, for 12 months external storage unless otherwise agreed by customer specification.

Physical Characteristics

Selected PE is used during manufacture to suit the required properties of the finished product.

Standard colours are Black or Red; other colours can be available on request.

Standard Duct sizes & Supply lengths

Nominal OD / ID	Individual Coiled Lengths (m)	Coils per Pack
63mm / 50mm	50m	4
60mm / 50mm	50m	4
58mm / 50mm	50m	4
54mm / 46mm	50m	4
50mm / 42mm	50m / 100m	4
44mm / 38mm	50m / 100m	4
38mm / 32mm	50m / 100m	4
37mm / 32mm	50m / 100m	4

Other duct sizes are available.

Other longer supply lengths can be available on request.
