**AX-S™ Steel
Fabricated Covers
Solid-Top**

Design and
Specification Guide

Water Cover Details

Cubis' AX-S™ steel fabricated access covers are designed and manufactured with an extensive range of options and accessories. Made from a minimum of 4mm thick structural steel plate and are hot-dip galvanised in accordance with BS EN ISO1461.

Cubis' range of steel fabricated access covers are bespoke designed to suit each installation. Requirements such as size of opening, valve equipment and expected rate of zinc corrosion are all considered before any final designs are produced for approval.

Cubis' range of steel access covers include Solid Top and Upstand and the LPCB Citadel range.

Typical Water Cover Details

Enclosed Padlock Box

Turnbuckle Locking

Hinged Cover Safety Stay

Concealed Cover Hinge

Recessed Hinged Safety Grid

Bolt Down Bracing

Concrete slab rebate for solid top AX-S™ steel fabricated access cover.

Twin Leaf - Steel Covers

Typical twin leaf end hinged sealed access cover

Support Beams - The standard removable universal beam used is 203x133x30 for cross member supports.

Typical twin leaf Inline hinged sealed access cover

Solid Top Vertical Loading

Solid Top covers are designed to meet the vertical loading requirements of BS: EN124.

Maximum Leaf Sizes

A15 - 1200mm x 1200mm
B125 & C250 - 1200mm x 1000mm

Opening Orientation

Cover opening are typically hinged on the longer side of the cover

Extras

Alarm bracket

A

1.5 tonnes vertical load

B

12.5 tonnes vertical load

C

25 tonnes vertical load

Safety Grid Styles

Hinged Safety Grid

Manufactured using open mesh flooring for excellent fall protection. Hinged relative to corresponding steel cover.

Cover Hinging - Covers are typically designed to be hinged on their longest side.

Pump-Through Safety Grids

Manufactured using open mesh flooring for excellent fall protection. Grids are hinged to allow opening either side of the relative pump.

Ladder Safety Grid

Ladder safety grids are designed to act as an extension of chamber ladders when erected, and function as fall protection when in the closed position.

Ladder Detail - Cubis works with various customer specified ladder types with details varying between customers. Please provide ladder position and approximate size or supply 2D CAD details if available.

Please provide 2D CAD drawings for the location of the pumping equipment

Pump Spacing Specification

The minimum spacing allowed between pump edge to pump edge is 275mm.

The minimum spacing from pump edge to frame opening is 70mm.

AX-S™ steel fabricated access covers are designed and manufactured from a minimum of 4mm thick structural steel plate.

And are hot-dip galvanised in accordance with BS EN ISO1461

Driven by Innovation

Cubis is Europe's leading manufacturer of network access chamber and ducting systems, used in the construction of infrastructure networks for rail, telecoms, water, construction and power markets.

Cubis has developed an innovative approach in an old-fashioned industry. This has been achieved by developing quality products which replace traditional construction materials, like bricks and concrete, with lightweight plastics incorporating intelligent design features. These can then be installed faster and ultimately save our customers both time and money.

Cubis manufactures preformed network access chamber systems STAKKAbOX™, AX-S™ access covers, MULTIduct™ multiple duct system and PROtrough cable trough at its manufacturing sites throughout the UK and Ireland these products are exported to more than 25 countries throughout the World.

At Cubis we pride ourselves on delivering technical customer support, new innovation, product quality and the highest levels of customer satisfaction.
