

Solar Wire Hangers

As renewable energy increases in the form of solar, it is critical that solar farms are equipped with the safest and most reliable infrastructure products. Panduit solar energy solutions provides robust end-to-end solutions that offer maximum reliability, productivity, and safety. The Panduit Solar Wire Hangers are easy to install, very durable and can be reused should future maintenance of the cable runs be needed.

Key Features

Benefits

Stainless Steel	Ideal for PV cable management in Solar Construction. Stainless Steel is highly durable and is suitable for harsh environments
Certifications	These Solar Wire Hangers are cULus Listed to UL1565 (File #E136577) which is key to meeting installation requirements
Ease of Installation	No tools required
Re-Usable	Many cable management solutions allow for just a single application. For reworking any wiring, it would be typical to replace the cable management device. Not necessary with these solar wire hangers that can be re-used numerous times.

Ordering Information

Part Number:	WH10SS-C
Construction:	304 Stainless Steel
Package Qty:	100 per bag / 1000 per carton
Certification:	cULus (UL 1565)
Mounting:	Hooks into and hangs on pre-drilled hole in solar module frame; typical hole is sized 5.6mm but can be smaller (needs to accommodate 1.8mm diameter wireframe)
Bundle Cap:	Closed channel provides 1" (25.4mm) bundle capacity, capable of accommodating quantity eight 8-gage PV wire
