

New PFISTERER Medium Voltage Cable Preparation Tool Kit

Further to collaboration via our clients, approved jointers and tool suppliers, we are pleased to introduce our high quality, compact MV Cable Preparation Tool Kit to the MV cable industry, which can be used for the preparation of MV cables with insulation diameters of up to 60mm.

What's inside the kit

- 1** Folding 2 m ruler
- 2** Round file
- 3** Knife
- 4** Long nosed pliers
- 5** Insulation chamfer tool
- 6** Sheath removal tool
- 7** Scissors
- 8** Fully bonded semi-conductive screen removal
- 9** Garrotte
- 10** Insulation removal tool
- 11** Easy peel semi conductive layer/sheath removal

MV Cable Tool Preparation Tool layout

Each of the MV Cable Preparation Tools are included in a cut out so they can be easily accessed and replaced in confined jointing areas.

We have covered all areas of cable preparation with the tools which we have included in the MV cable preparation kit, sheath removal, handling of the easy peel semi conductive layer, insulation removal with the additional option of fully bonded semi conductive layer removal
