

Dropped Objects Prevention Walkway Mat

Data Sheet v2.2

DROPPED OBJECTS PREVENTION Walkway Mat

Description

Hard-wearing, slip-resistant matting perfect for commercial and industrial workplaces. Dropped Objects Prevention Walkway Mat is heavy-duty slip-resistant matting designed to withstand all kinds of liquids. The mat's diamond tread pattern provides superior traction underfoot, which not only helps to reduce the risk of people slipping but also helps to prevent equipment from falling.

Made from non-porous PVC with a two-layer grid construction, Dropped Objects Prevention Walkway Mat is impermeable to fluids and can withstand low temperatures without cracking or curling. The open grid also ensures excellent drainage, making it ideal for workplaces where spillages are likely, such as industrial environments, commercial workplaces and commercial food service areas.

Features

- Diamond cut pattern
- Two layer open-grid construction
- Made from non-porous PVC
- Proven anti-fatigue properties

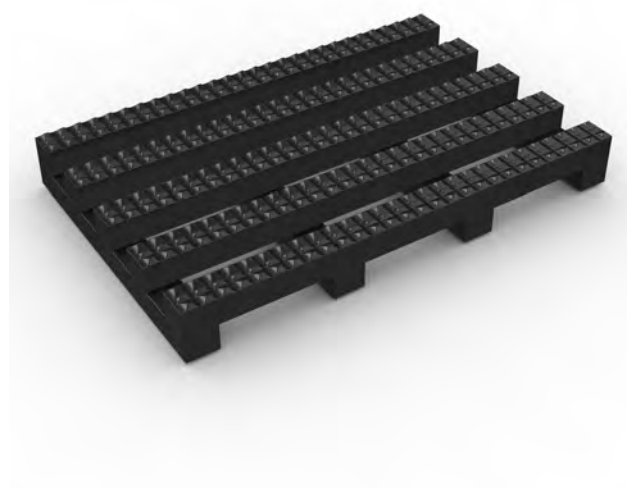

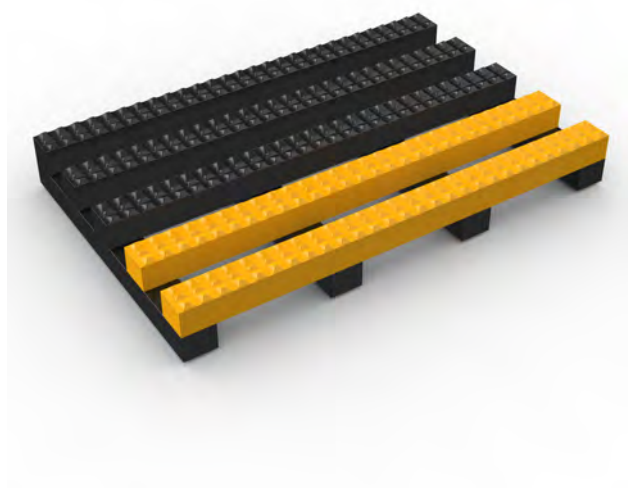

Benefits

- Certified slip resistant (DIN 51130: R11, ASTM 1677: 1.0/0.9)
- Excellent drainage (DIN 51130: V10)
- Fire resistant (EN ISO 13501-1:2007-Cfl-SI)
- Chemical, oil and acid resistant
- UV Stabilized
- Contours to uneven surfaces
