

 WIRING
PIPES

YOU STAND FOR OUR SUCCESS

New technologies guarantee the improvement and innovation of our products. For you.

WIRING PIPES

Wiring pipes and accessories are designed for the protection and routing of electrical or data cables up to AC 1000 V or DC 1500 V. KOPOS KOLÍN a.s. has a wide range of plastic, metallic, rigid or flexible wiring pipes. These pipes are made of classic PVC, halogen-free materials PE, PP, PA or PC ABS with mechanical strength from basic 125N up to 4000N for different kind of use. The pipes are suitable for indoors as well as outdoors installations, for which UV stable electrical pipes and accessories are used. We offer a large number of accessories for all pipes (couplings, clamps, elbows, ...). Some of our pipes and accessories can be installed in areas with explosion hazards of flammable gases and vapours of zone 2 and to the area with a risk of explosion of flammable dusts of zone 22. In addition, the pipes are tested for IK mechanical protection and the steel pipes comply with the highest protection of IK10.

Icons - legend

	material		mechanical protection
	temperature resistance, scope of application (°C)		functionality during a fire
	fire reaction class of underlying material		halogen-free material
	self-extinguishing		UV stable
	mechanical resistance / load limit value (N)	dn	outside diameter
	classification code according to ČSN EN 61386-1	di min	inside diameter
	area with a risk of explosion		

**KOPOS****WIRING PIPES**

MONOFLEX®

- For surface installation, into or under parget.
- Suitable for mounting into hollow walls, plaster walls, ceilings and wooden constructions.
- It is possible to install on premises where there is danger of explosions of flammable gases and vapours (zone 2) and on premises where there is danger of explosions of flammable dust (zone 22).

SUPER MONOFLEX HFPP

- Flexible halogen-free self-extinguishing pipe made of PP with low smoke.
- For installation on the surface, in plaster, under plaster or into concrete.
- Suitable for mounting into hollow walls, plaster walls, ceilings and wooden constructions.
- It is possible to install on premises where there is danger of explosions of flammable gases and vapours (zone 2) and on premises where there is danger of explosions of flammable dust (zone 22).
- Halogen-free pipes are used on premises where the safety of people and property is primary, e.g.: public buildings, hospitals, schools, theatres, airport halls, shopping centres, etc.

COMPANY POLICY

**INNOVATION**

We continuously search for new ways leading to technology and products improvements.

FLEXIBLE AND INDIVIDUAL APPROACH

Our customers enjoy the complex service and their requirements are solved individually. We are building a strong and long-term business partnership.

RESPECT

We respect people as individualities. We pursue open dialogue and a common solutions. Gentleness and helpfulness promote good relationships.

TEAMWORK

We recognize the fact that each employee contributes to the company growth; only motivated and cooperating teams become successful and continuously achieve the goals.

EDUCATION

Expertise and skill enhancement are an integral part of the company strategy.

SAFETY

Environmental protection, occupational safety and health are a requirements embedded in all our company activities. We comply with the strict standards of ethics and work control.
